## **A Single-click Window To All Hotel Bookings**

### **INTERGLOBE TECHNOLOGY**

Quotient has just brought Travelport's booking tool Rooms and More to India. This puts global aggregators of hotel rooms on one platform, allowing travel agents to access, compare prices and inventory of over 450,000 hotel properties in one go. More are expected to come on board soon. This is good news for travellers who stand to get more choices, better prices and quicker bookings. Only question is, for how long? With airlines trying to woo buyers back to their sites and away from aggregators, will hotels do the same as well? — *Chitra Narayanan*
