

Travelport Mobile Agent™ Now Launched in US and Canada

Atlanta

Jul 15, 2013

Travelport, a leading distribution services and e-commerce provider for the global travel industry, today announces the launch of Travelport Mobile Agent™ in the United States and Canada.

Travelport-connected agents in the United States and Canada using either the Apollo or Worldspan GDS platforms are now able to download Travelport Mobile Agent to access and modify bookings on-the-go via their iPad, iPhone, iPod Touch or Android devices.

Travelport Mobile Agent has been successfully deployed across the globe and has been downloaded more than 21,000 times since its initial launch in October 2011.

Montreal-based travel agent Sarita Sawhney, vice president, Voyages Cortravco, highly recommends Travelport Mobile Agent to other industry professionals. She said, "I've used Travelport Mobile Agent on my iPad and it is a great tool to have, especially if you are a service-oriented agent who would want to be out of your office at any given time to service your clients. It is an application where you can log in and have the same experience as being at your desk in front of your GDS, accessing your own files at any given time. It's easy to pull up PNRs to make a reservation, to do a ticket exchange, and it is the most amazing product out there today for me as an agency owner and agent being in the business for 22 years."

Scott Hyden, Travelport's managing director, The Americas, says "Travelport Mobile Agent is an incredibly useful tool for travel agencies and their travel agents that want to be competitive in a 24/7 industry, where immediate response and customer service are a must for business success. We have had so much success with this solution in other

regions and I have no doubt that this application will be just as successful here, where mobile technology adoption is one of the highest in the world.”
