

TravelSky and Travelport ink hotel co-operation

Ground-breaking partnership boosts hotel content available to travel agents

Beijing, China, 29 February 2012 – Travelport, the business services provider to the global travel industry, and TravelSky Technology Limited, the leading provider of information technology and commercial service for China's travel and tourism industry, today announce a ground-breaking partnership to dramatically boost hotel content available to travel agents in China and around the world.

Under the new agreement, TravelSky will receive access to Travelport's GDS and non-GDS hotel content, providing TravelSky's 7,000 ticketing agents with real-time pricing and availability from over 250,000 hotel properties with a combined total of more than 650,000 hotel offers worldwide.

Travelport-connected agents worldwide will also gain unprecedented access to TravelSky's hotel content in China via the Travelport Rooms and More™ booking engine. Tailored for travel agents, Travelport Rooms and More utilises meta-search technology to deliver unparalleled hotel content in a completely integrated booking platform. TravelSky content will further enhance the hotel choices that Travelport-connected agencies can offer their corporate and leisure customers when visiting China.

"This innovative collaboration between TravelSky and Travelport is the latest in a series of initiatives that the two companies have co-operated on from e-ticketing, the provision of international airline content to the joint development of IT solutions for airlines. Expanding our relationship now to include hotels gives both TravelSky and Travelport customers an even wider array of informed travel choice," said Gordon Wilson, President and Chief Executive Officer, Travelport.

"This cooperation allows Travelport and TravelSky to each share and exchange their hotel content and channels, allowing our respective agency customers to obtain a wealth of international and domestic hotel content in a quick and efficient way. Moreover, the technical connectivity provides users with an enhanced online distribution experience," said Huang Yuan Chang, Executive Vice President for TravelSky.

This latest partnership builds on a 15 year relationship between the two companies, which most recently included a joint development agreement for advanced Passenger Service Systems technology for airlines.
