LANGLEY, U.K. — With airlines around the world releasing their own health and safety protocols in response to COVID-19, Travelport has launched a new tracking tool that helps agents streamline all individual policies.

Available free of charge to both Travelport customers and the wider industry, the Travelport Airline Health & Safety Tracker highlights the safety measures of more than 80 of the world's largest airlines. It monitors the use of seven main measures: mandated use of face masks; socially distanced seating; temperature checks before boarding; improved air filtration; enhanced cleaning programs; reduced onboard food and beverage services; and mandated traveller health certification or declaration.

The data is presented in a simple visual format and is updated weekly by Travelport. The tool is delivered to both online and offline travel agencies through the recently launched Travelport COVID-19 Smartpoint Plugin, Travelport's API-based merchandising solution, Branded Data File, and the company's COVID-19 Resource Hub, which is also available to the general public.

industry recovery.”

In the Travelport COVID-19 Smartpoint Plugin, which can be downloaded from Travelport Marketplace, the information is available alongside details on government restrictions, lockdowns and safety measures – updated on a daily basis by global travel safety intelligence provider, Safeture. Information can be surfaced at the click of a button, based on the itinerary being booked. A video demonstration can be found [here](#).

As the airline safety information is also available through Travelport Branded Fares Data File, Travelport’s online travel agency, corporate booking tool, and travel meta-search customers can easily integrate Travelport Airline Health & Safety Tracker data into their own booking tools.
