

# **Travelport Launches COVID19 Smartpoint Plugin**

Travelport has launched a COVID19 Smartpoint Plugin designed to provide travel agencies with the latest information on government restrictions, lockdowns and safety measures around the globe.

The plugin is available free of charge to all Travelport customers globally, using Travelport Smartpoint 8.2 or above, and can be downloaded directly from Travelport Marketplace.

The new tool provides detailed information on a range of topics, including: lockdown rules, entry requirements and quarantine measures for travelers.

Kyle Moore, Global Head of Customer Strategy and Marketing, Travelport, said, “The travel ecosystem today is probably the most complex it has ever been, with government, airline, and hotel policies in every country constantly-changing. We’re making sure our agent partners no longer need to constantly leave their workflow to search for accurate and up-to-date information – greatly improving their efficiency in servicing their traveler customers.”
