# Travelport Launches COVID19 Smartpoint Plugin

By **Admin** - 15/07/2020

Travelport has launched a COVID19 Smartpoint
Plugin designed to supply journey companies with the newest
data on authorities restrictions, lockdowns and security
measures across the globe.

The plugin is accessible freed from cost to all Travelport
prospects globally, utilizing Travelport Smartpoint 8.2 or above, and
may be downloaded straight from Travelport Market.

The brand new software gives detailed data on a spread of
matters, together with: lockdown guidelines, entry necessities and
quarantine measures for vacationers.

Kyle Moore,
International Head of Buyer Technique and Advertising and marketing, Travelport,
mentioned,
"The journey ecosystem in the present day might be probably the most advanced it has
ever been, with authorities, airline, and resort insurance policies in each
nation constantly-changing. We're ensuring our agent companions
not must consistently go away their workflow to seek for
correct and up-to-date data – tremendously enhancing their
effectivity in servicing their traveler prospects."
